Used extensively by police forces throughout the USA, the DEW PD series of ballistic door panels convert ordinary police vehicle doors into ready-to-use protective shields. These panels are integrated into the interior of the door, between outer skin and interior trim, and are not externally visible.

**PROTECTION LEVEL**

*See Qualified Threats table.

**TESTING**

Third party testing in accordance with the requirements of:
- NIJ Standard 0108.01
- LAPD Specification MTD 11-BDPO1

Durability testing:
- Shooting at extreme hot and cold temperatures
- Pre-condition test panels by hi/low temperature cycling
- Pre-condition test panels by salt water submersion
- 100,000 x door slams

The DEW PD panels are available as a factory installed option from Ford Motor Company, or contact us for aftermarket products on all makes (Ford, Dodge and Chevy) of Pursuit Rated police vehicles.

Since 1993, DEW armor has been saving lives in Iraq and Afghanistan being successfully integrated on numerous platforms including the US military Stryker vehicle. Our active R&D program and on-site ballistic range are the key to rapid protection development to counter today’s emerging threats.
